

TechVision Consulting

Capability Statement

Industrial advisory for edible oils, oilseed processing and biodiesel projects.

Owner-side CAPEX, EPC, procurement, commercial and performance improvement support for industrial owners, investors and plant teams across Europe and selected global markets.

WHO WE SUPPORT

- Plant owners and asset owners
- Investors and new market entrants
- Edible oils producers and traders
- Industrial project teams (CAPEX/EPC)
- Operating plants focused on performance improvement

INDUSTRIES

- Oilseed crushing plants
- Edible oil refineries
- Biodiesel plants
- Biodiesel feedstock preparation / pretreatment
- Vegetable oils production and related trading operations

CORE SERVICES

- Investment concept review and technical-commercial pre-feasibility checks
- CAPEX / OPEX / TCO evaluation and scenario comparison
- Technology and process route comparison for owner-side decision making
- EPC and supplier proposal review (scope, assumptions, risks, value)
- Procurement review and negotiation support from owner perspective
- Project governance support: risk map, milestones, owner controls
- Commissioning and start-up readiness preparation
- Plant audits: bottlenecks, downtime mapping, bad actor analysis
- Performance improvement: yield, throughput, energy and process cost reduction
- Translation of operating KPIs into margin and EBITDA impact

EXPERIENCE HIGHLIGHTS

- 20+ years across edible oils, crushing, refining and biodiesel-related projects
- Experience supporting teams connected with Cargill, Bunge, Wilmar and multiple European assignments
- Practical background in production, project delivery, commissioning and performance optimization

GEOGRAPHIC FOCUS

Europe-focused. Available for selected global assignments.

Priority markets include Spain, Romania, Moldova, Ukraine and broader Europe.
